

John Company 2nd Edition

DrBo6's Cheat Sheet: Version 13 (12/23)

Note: Deregulation rules are highlighted in blue. Skip these until you have played some games. Bonus money is highlighted in green.

FIRST GAME SETUP

1. Remove these cards:
 - Deregulation - Do not call a vote for deregulation until you are familiar with the game.
 - The "Governor General" law.
 - The "Old Ideas Made New" dilemma.
2. Shuffle the following cards into the bottom half of the deck:
 - Any Dilemma laws
 - The "Foreign Invasion" India Tile
3. Give yourself the following cards at the start:
 - Chairman
 - President of Bengal
 - President of Madras
 - Military Affairs (4 players)
 - Director of Trade (5 players)
 - President of Bombay (6p; but maybe just don't play 6p as your first game)

SETUP

1. Take out the tokens tray and the coins tray.
2. Give players their family components:
 - Family board (Family side for most games, Firm Charter side for the 1813 scenario)
 - 18 family members tokens
 - Opportunity marker (glass bead) near family actions but not placed on any of them
 - Victory point marker
 - 5 promise cards for long-term negotiations
 - 2 firm cubes (only used for 1813 scenario or when the deregulation law is passed, and you have a firm)
 - 4 strategy cards (only used for 1813 scenario or when the deregulation law is passed, and you have a firm)
3. Setup the game board:
 - Place families' victory point markers at 0 on the track.
 - 4 power tokens on power track.
 - Loot tokens on corresponding regions.
 - Domes with tower levels and flags cf. scenario setup card.
 - Cash in Office Treasuries cf. scenario setup.
 - Close orders/regiments (scenario setup card)
 - Local alliances in bottom of 3 army boxes.
 - Place the 6 pawns (values cf. the scenario setup cards unless specified otherwise):

- Red: Company balance at 5 (#20 on image)
 - Red: Company standing at S (#3)
 - Red: Company debt at 0 (#4)
 - Black: Voting tracker at 0 (#22)
 - Black: Starting turn (scenario year, #6)
 - Silver: Family Action (of the Phases, #7)
4. Select a large scenario setup card and follow its instructions.
 - 1710 unless you already know what you are doing. Skip everything highlighted in blue on this cheat sheet.
 - 1758 will introduce deregulation and other advanced rules.
 - 1813 has deregulation already in play and starts with a challenging situation.
 - Erratum: Place the +2/-2 overlay on Court of Directors.
 - Long 1710 scenario uses the 1710 setup card but play from turn 1 through turn 8 for an epic experience.
 5. Place the laws (shuffled), officeholder (ordered) and small setup cards nearby. Order the Shipyard cards.
 6. Shuffle the blackmail and prestige cards together and deal the top three cards to the London Display.
 - Blackmail cards stay facedown, prestige cards are flipped faceup in the London Display.
 7. Set the Prime Minister dial to the scenario's year.
 8. Deal the small scenario setup cards to the players or hold a card draft with them.
 - Remove the Extra cards with players ≤ 4.
 - Remove 3 random Extra cards at 5 players.
 - Give each player what is on the setup cards.
 9. Place remaining officeholder cards near the board.

READING THE BOARD

The Game Board

- #1 - **Victory Point Track**
- #2 - **Power Track** (see terminology ref.)
- #3 - **Company Standings** and **Company Expectations** (£s underneath the standings).
- #4 - **Company Debt Tracker**
- #5 - **Prizes** are the houses. Their cost is printed in purple, and their upkeep expense is printed in white on the left. The amount of Victory Points they add is printed on the right. In the middle of the card the depicted Windows Icons are used for Windows Taxes and determining order in some situations.
- The red line is sometimes referred to as the **Ribbon**. It starts with the **Turn Tracker** (#6) and then goes through both the **Phases** of the game (#7) and the **Offices** of the Company (as described in Sequence of Play, #10-#16).

- The spots marked with £2, £3, £3, £4 and £5 are called the **Stock Exchange** (#9), it is printed above the **Court of Directors** (#10).
- There is an **Army Box** on the board for Bombay (#17), Madras (#18) and Bengal (#19). It has a spot for a Commander and a top and bottom half. The top and bottom contain army pieces, such as Officers (family members), Regiments or Local Alliances. When a piece is in the top half, it is active. An active piece can grant its strength in an attack, after which it will become exhausted and moved to the bottom half.
- #13 - The **Officers-in-training Box** is the box on the board that is part of the Military Affairs office (#13).
- The **Director of Trade** (#11), **Manager of Shipping** (#12) and **Presidency of Bombay/Bengal/Madras** (#14-16) all have an **Office Treasury** in their box, and the Presidencies also have spots for **Writers** in their box.
- #20 - **Company Balance**
- #21a-c - **Sea Zones**. #21a is the zone associated with Bombay, #21b is associated with Madras, and #21c is associated with Bengal.
- #22 - **Voting Tracker**
- The **London Display** (#8) will offer players a pick of Prestige Cards (such as additional enterprises or spouses) and Blackmail Cards (always face-down until played).
- Whenever an Officeholder leaves office, their office is put in the **Vacant Office Box** (right of #24). When Officeholders retire, their corresponding family member token joins the **Pensioners** box (left of #24).
- **India** (#23) has 3 **Presidencies** and 8 **Regions**.
- The **Presidencies** have Bombay, Madras and Bengal as their **Home Regions**.
- A **Region** has the following properties:
 - **Orders**: Circles with money value. Can be open or closed. The dotted lines between them allow players to create Trade Routes.
 - **Home ports** are Orders with thick borders within Bombay, Madras and Bengal, located next to their associated Sea zones. These are the Orders where each Presidency must start their trade routes when trading.
 - **Export Icons** (white icons resembling boxes): When the Superintendent of Trade in China's Office is active, these icons in Delhi, Bengal (2), Hyderabad and Madras can generate extra money.
 - **Region Strength**: The tower levels (excl. the domes) and/or unrest cubes determine attack/defense value.
 - Regions can be **Sovereign/Dominated**:
 - Star Flag = Sovereign Region; Capital Region of an Empire
 - Small flag = Dominated region of an Empire
 - No Flag = Sovereign Region, but not in an Empire
- **Empires** are indicated by flags (see Sovereign/Dominated) and often combine the strength of their regions. An Empire with a single flag loses its flag and is no longer an empire.
- The **Elephant** indicates where the next crisis (i.e., Invasion or Rebellion) might happen during the Events in India stage.

- **Loot Tokens** give extra coin to players when they Deploy successfully in that region for the 1st time. They are also used to connect a Presidency to a Region after a successful Deploy action.

CONCEPTS AND COMPONENTS

- **Component/Tracker Limitations**
 - Components are limited by the pieces provided, except for cash, Trophies, Passed Law Tokens, Dice and Regiments.
 - Trackers are limited, except for Company Balance, Victory Point and Vote Tracks. Use money to keep track of votes when going over/under its limits.
- **Treasuries/Cash:**
 - Company/Office Treasuries: The Company Treasury is spread across its Office Treasuries.
 - Family Treasury is the coin a player has.
 - London Treasury is only used in a game with Deregulation in play. It is the treasury of a firm.
 - India Treasury is only used in a game with Deregulation in play. It is the money a firm has gained from trade in India. Every 6 cash that comes into it increases the Firm Value by 1.
- **Public/Hidden information:**
 - Only Blackmail Cards and - if Firms are in play - Strategy Cards and their associated coin are ever hidden information.
 - Players can peek at Blackmail Cards as part of a negotiation or when selecting them from the London Display.
- **Trading and Negotiation:**
 - You can transfer most assets, incl. but not limited to enterprises, unused facedown blackmail cards, cash in your family's treasury, shares (except for the chairman), and promise cards between players.
 - Adjust Victory Points on the tracker when transferring items with Victory Points.
 - Negotiations involving immediate transfers are binding. All other negotiations are non-binding.
 - Transferred items cannot be activated twice in the same turn.
 - **Promise cards** cannot be used during final scoring. They are returned after use.
 - You *cannot* transfer family members (unless they are Shares), pieces on prizes, spouses, passed laws, played faceup blackmail cards, the Prime Minister dial, or trophies.
- **Success Checks/Make a Check:**
 - Roll a d6, use the lowest rolled value.
 - 1-2 = Success

- 3-4 = Failure; Re-rolls are allowed if funds are available
- 5-6 = Catastrophic Failure; Return the acting Officeholder immediately to the player's supply. Flip their Office card and move it to Vacant Offices. Remove any Fatigue Cubes.

- **No Dead Actions Rule:** A player can never take an action that would have no effect or chance of success.

SEQUENCE OF PLAY

Special Session of Parliament

Skip this phase entirely 1) on the first turn, and 2) on subsequent turns as well in the 1710 and 1813 scenarios. It is not printed on the Ribbon.

- **The Prime Minister**
 - may call a Vote to Deregulate if the Company Standing and Company Debt markers are at lined spaces.
 - must call a Vote to Deregulate if the Company Standing or the Company Debt markers is on a star space.
 - Success/passed:
 - Lower Company Debt 1 space for every 2 debt.
 - Place the Standing Marker on the S-space.
 - The Prime Minister gains a Passed Law token.
 - Deregulation is now in play and Firms can be created.
 - Failure: Increase the Company Shares' value by either placing or flipping the Victory Points Overlay Token in the Court.
 - The Prime Minister cannot change hands in a Deregulation vote, it is not associated with a policy, it is not discarded, and the Prime Minister can vote against it.

London Season

Skip this phase entirely on the first turn

1. Resolve **Attrition**
 - Roll 1d6 for each officeholder
 - Add +1 to the result for each officeholder that has a Fatigue Cube
 - Add +1 to the result for the Chairman
 - Resolve results
 - 1-2: Nothing happens
 - 3-4: Add a fatigue cube to Officeholder Card
 - 5-6: Move Family Member to Pensioners, move Officeholder Card to Vacant Offices.
2. Resolve **Retirements**
 - Start with Chairman or former Chairman if vacant
 - Retire Pensioners to Prizes (houses) by paying the purple £-value listed on them, keeping track of the amount of £ each player has spent on Prizes this turn.
 - Spouses with -£X subtract X from the Prize they buy. They stack but they can only be used once per London Season/Final Scoring.

- Update Victory Points track cf. acquired Prizes.
- White £-value = upkeep costs at the end of the turn.
- Each player with at least one Firm Share (with any Firm) that paid out Dividend (as indicated on the Company Balance tracker by a Firm Cube) is allowed to perform a **Special Retirement**:
 - They are allowed to use a piece from their Supply rather than from the Pensioner box.
 - They cannot exceed the value of the highest total dividend paid out by a Firm in which they own a share.

3. Pick Prestige cards from **London Display**

- Only players with retirees, in order of: 1) Spent the most on Prizes, 2) Most Windows, 3) clockwise starting with Prime Minister.
- Must take one or discard one card. Allowed to peek at Blackmail.
- Phase ends when there are no more cards. If there are cards left, discard all of them and refresh the display.
- Update Victory Points track cf. acquired Prestige Cards (and do not mix up Power and Victory Points).

4. **Return Pensioners** that did not receive a Prize to their Supply.

Family

1. Each player selects a **Family Action**. (Chairman 1st, clockwise)

- There are three ways to get **extra actions**:
 - Check for any laws that have "Extra Actions". Only the most recently passed law with an "Extra Action" can be used, if any. Do not reposition your marker.
 - If there are 4 or more vacant offices, you may place 2 writers instead of 1 if you choose to Enlist a Writer.
 - If you pick the same action that you picked last turn, you get to do it twice.
- Pick from the following list:
 - **Enlist Writer**: Place 1 family member in one of the Writer spots (attached to each of the 3 Presidencies).
 - **Enlist Officer**: Place 1 family member in the Officers-In-Training spot (attached to the Military Affairs office.)
 - **Purchase Luxury**: Pay £4 and take a luxury card. Adjust Victory Points.
 - **Purchase Shipyard**: Pay £2 and take a Shipyard card and the corresponding ship token. Place the ship token on the card.
 - **Purchase Workshop**: Pay £5 and take a Workshop card.
 - **Seek Share**: Place a family member on any empty space on the Stock Exchange Track (above the Court of Directors) and pay the corresponding £-value.

2. After all actions have been chosen, **new company shares** are created.

- If Firms are in play, flip any face-down Shares in the Court of Directors face-up.
- While the company has debt, move the debt marker one spot to the left and add the right-most family member from the Stock Exchange Track onto the Board of Directors.
- If Firms are in play, flip any new Shares in the Court of Directors face-down.
- Once the company has no more debt, move any remaining family members as far to the right as possible while preserving their order.

Firms

If the Deregulation Law is not active, skip this phase entirely.

1. **Make Firm Investments**

- Take any of the following actions in any order (while respecting the limitations below):
 - **Form a Firm**: Return a Family Share to the Supplies OR flip a workshop to the invested side. Next, flip the Family Board to the Firm Charter Side and Place a Family Member in its Shares Box. Place one of your Firm Cubes on the left-most space of the Value track and add £5 from the bank to the Firm's London Treasury.
 - **Invest in a Firm**: If a Firm's Manager (owning player) consents, players may invest in a firm by
 - Removing one of their Company Shares back to their Supply OR flipping one of their Workshops to its Invested side.
 - Company Shares can only be used for formations and investments if
 - Company Standing is not on a lined space
 - The company share was not created in the most recent Family Phase (and flipped face-down).
 - Adding £5 from the bank to its London Treasury AND 2) placing one of their family members in the Shares Box.
 - **Investment Limits**: Firms can have only 10 Shares, but they can always accept more investments without generating shares.
 - **Fit an Unfitted Ship**: Pay £3 from the London Treasury to fit a Ship from a Shipyard with its owner's consent to the Ships box on the Firm Charter Board.
 - **Buyback a Player Ship in service of the Company**: Transfer £3/£2 from the London Treasury to the Director of Shipping Office's Treasury to move a unfatigued/fatigued fitted Ship with its owner's consent

from its Sea space to the Ships box on the Firm Charter Board.

▪ **Perform a Hostile Takeover:** If you do not manage a firm and you have consent of the players that hold the majority of a firm's shares, you may perform a hostile takeover. Copy the state of that Firm with your own components while the original Firm's player reverts his board back to the Family side.

○ The owner can still invest to regain majority and cancel the takeover.

▪ **Negotiate a Merger:** If all involved firms have full consent of every shareholder, multiple firms can consolidate their assets into a single firm and become regular families again. The single resulting firm has to have the highest value of all involved firms.

2. Set Firm Strategies

- Secretly play your **Firm Strategy Card** face-down.

▪ These determine what sea zone your ships will be trading in.

▪ The Hob-Nob strategy does not let you trade but allows you to keep the Dividend score from the last time you traded.

- Secretly set aside an amount of money (bid) that you will allocate to trading - e.g., hold it in your fist or cover it with your hand.

- When everyone has played their card and allocated their money, reveal the results and put them in the assigned spots of the Firm Charter Board.

• The Firm manager resolves internal timing conflicts, the Prime Minister external ones

Hiring

Skip if there are no vacant offices.

• During this phase, **Fill all vacant Offices** using the guidelines on the back of each card, in the order printed on them, using the following rules:

- **Nepotism:** You may select your own family member, but you must have the consent of every other player in that office's candidate pool (which could be just yourself). This does not apply to hiring the Chairman.

- **Promotions:** Some higher offices are hired from lower offices.

▪ When this happens, add the lower office's card to the stack of vacant offices.

▪ Carry any fatigue tokens over from the lower office to the higher office.

- If there are **no candidates or hirer**, then the Office remains vacant throughout the turn and no actions are taken for it.

- Players cannot refuse an Office when their family member is appointed to it.

- If there is a valid candidate, then they must be hired. A candidate that would fall under the nepotism rule and that does not have consent, is not considered a valid candidate.

• The **Chairman Election** is unique:

- Every Company Share is a vote; needs more than half of total.

- If no candidate receives enough support, the former Chairman picks any player with a Company Share (including themselves) and gets to ignore the Nepotism rule.

- If the Court of Directors is empty, then the former Chairman becomes Chairman again.

- The Company Share that becomes Chairman still counts as a Company Share but cannot be traded **or used for investments** (when Firms are in play).

• A Commander is not an Officer and cannot be promoted to Governor.

Chairman's Office

1. Set the debt marker

- Each advance = £5 for the Company Balance

- More than 3 advances require majority vote in Court of Directors (incl. Chairman).

- You cannot advance the debt marker beyond the right-most spot.

2. **Must allocate all funds** in the Balance. (See expectations under Company Standing.)

- Move funds from the Company Balance into the Company Treasuries (Director of Trade or Governor General, Director of Shipping and the 3 Presidencies) until none is left.

Director of Trade / Governor General

Resolve Director of Trade if the Governor General is not in play. Otherwise, resolve Governor General instead.

Director of Trade

1. May send **Special Envoys**

- Make a check, 1 die per £1

- Success, choose:

▪ Place the Superintendent of Trade in China board and add the card to the Vacant Offices. Hire immediately.

▪ Open an order in any region that is not company-controlled.

2. May make up to **Two Transfers:** Move In each, move one Writer/Ship to one Presidency/Sea Zone.

Governor General

1. **Must increase the Balance** by £3 for every Company-Controlled Region.

2. **Govern** - You may attempt this any number of times, but you may only do it once successfully.

- Make a check, 1 die per £1

- Success:

- **Receive a £1 bonus for each Company-Controlled Region.**

- For each Company-controlled region, you must choose one of the following:

- Place a **Company Ship** in *any* Sea zone

- Unlike the Director of Trade, a Governor General cannot Transfer fitted Ships (or Writers)

- Place a **Regiment** in *any* Army

- **Tax:**

- 1. Increase either the Company Balance or *any* Company Treasury except your own by £2.

- 2. Place an unrest in a Company-controlled region. If you make this choice multiple times in a single turn, you must place the unrest in a different region for each.

- Failure: Place 1 unrest in *each* Company-controlled region

- For each 6 rolled: Place 1 unrest in *each* Company-controlled region

Director of Shipping

- **Must purchase ships until there is £2 or less left in its Treasury.**

- Can always perform the following actions:

- **Fit Shipyard Ships:** £3, move ship from shipyard to any sea zone (incl. China). This does not require owner consent.

- **Lease Extra Ships:** £2, extra ship to any sea

- Can only perform the following actions when there are no ships on shipyards:

- **Buy Company Ships:** £5, company ship to any sea

Military Affairs

1. **Army Transfers** (up to 2x): May move Officer/Regiment between Armies' top halves

2. **Must assign all Officers-in-Training** to any Army box's top half

3. Update **Commanders:**

- If a player has more total pieces than the current Commander's players, swap one of that player's Officers in the top half of the Army box with the current Commander

- If the commander slot is vacant, fill it with an Officer of player with the most pieces in the Army box.

- Since this is not a Hiring, the Nepotism rule does not apply.

Presidency Operations

1. **Firm Strategy Declarations:** If Firms are in play, the President (or Chairman if vacant) asks if there are any Firms who have selected a strategy associated with the current Presidency's Sea Zone. If so, those Firms follow these steps:

- Reveal the Strategy Card

- Make a check, dice = allocated cash (The President's check includes a dice penalty for non-home regions, but the firms do not have to include that.)

- You only get one chance to roll a success

- You must make the check and pay, even if the Region's Home port is closed.

- Success: The Firm may perform a Trade action during this Presidency Operations phase with initiative = total ships - amount of successes

2. The **President must decide the order** in which a) **any Firms and** themselves, b) their Governors and c) their Commanders perform their respective Actions.

- If the President's Office is vacant:

- The Chairman decides the order or breaks ties in their stead, but they do not get to Approve Alliances (during the Commander's Actions) or take the President's Trade Action.

- Firms will take their Trade Actions (see below) either 1) during the President's *successful* Trade Action, or 2) after the Governor and Commander have had the chance to take Actions.

President of Region (and Firms)

- **Trade Routes** start from and include a Presidency's Open Home Port and continue through any Open **or Previously-Filled** orders connected to each other by dotted lines. You may branch in two directions from an Order, but the following limitations apply:

- Limitations:

- Trade Routes cannot include Previously-Filled Orders created in a previous turn. (Use the Red Divider Tokens to separate new Trade Routes being filled from Trade Routes created in previous turns.)

- A President's Trade Route can also not include Orders in another Presidency's Home Region.

- Number of Orders:

- As a President: Number of Orders = Number of Ships in the Home Port's Sea region

- As a Firm: Amount of Orders = Amount of Ships on the Firm Charter Board + 1

- Total £-value:

- The total £-value of a Trade Route is calculated based on whether its Orders were Open or Previously-Filled

by another Trade Route, before the new Trade Route passes through it:

- For each Open Order: Add full listed £-value to the Trade's Route total £-value.
- For each Previously-Filled Order: Add ½ £-value, rounded down (which is printed on the board next to the order).

• **Resolving the Trade Action:**

- If the President wants to take their Trade action, make a check at £1 per die and subtract 1 die per non-Home Region in their intended Trade Route.
 - **Success:** The President may perform a Trade.
 - If Firms are in play, the President's Initiative is ships in the sea region - amount of successes.
 - **Non-catastrophic Failure:** The President may try this again.
 - If the President does not or cannot trade, Firms trade after the Governor and Commander have had a chance to act.
- Trade Actions are completed with lowest initiative going first. Ties are broken by 1) President, 2) Chairman.
 - As a President:
 1. Fill your Trade Route (Max Orders = Number of Ships). Place Writers in from the Presidency box first, then use Filled Order Tokens.
 2. When filling an Order next to an Order that was filled during a previous turn, put a Red Presidency Divider Token on the dotted line between them.
 3. Add the total £-value of the Trade Route to the Company Balance (counting ½, rounded down for Orders previously filled by Firms this turn).
 4. Presidents receive a £1 bonus for each filled order of their Trade Route.
 5. Writers (not Filled Order Tokens) receive a £1 bonus for each Order they fill on the Trade Route.
 - As a Firm:
 1. Fill your Trade Route using only use Filled Order Tokens.
 2. When filling an Order next to an Order that was filled during a previous turn, put a Red Presidency Divider Token on the dotted line between them.
 3. Add the total £-value of the Trade Route to the India Treasury on your Firm Charter Board.
 4. For every £6 added to the India Treasury, advance the Firm's Value Marker one space.

Commander

1. **May request Local Alliance funding** from your President: If consent is given, move the purchased Local Alliance pieces to the top half of the Army Box.
2. **Deploy Action** (as many times as you wish and can afford, including zero).

1. Select a target (either not company-controlled or having a closed order/unrest):
 - Your President's Home Region
 - Any *Region associated with your Presidency*
 - Any Region bordering a *Region associated with your Presidency*
2. Make a check; number of dice = number of Officers/Regiments you Exhaust - region strength
 - Exhaust = move to the bottom half of the army box
 - Empires includes all their Regions in their strength
 - Company-Controlled Regions have 0 base strength
 - Can re-try the check if no catastrophic failure
3. Check for Losses: d6 for each Exhausted Officer, return to supply on 6s.
4. **Success:** Loot the Region and make it Company-Controlled
 - Calculate Loot: Amount = (Tower Levels * £4) + faceup Loot Token Modifier (unless this is less than Amount of Exhausted yet Surviving Officers + 1, in which case increase the amount by the difference.)
 - Distribute the Loot among those that participated and survived.
 1. The Commander receives £1 bonus.
 2. Each Surviving Officer (clockwise from Commander) gets £1 bonus.
 - 3. Pay £1 to the bank for each Regiment and Local Alliance
 - 4. Continue and Repeat until the entire Loot sum has been allocated.
 - The Commander's player gets 1 Trophy per level of the Targeted Region's Tower.
 - Remove the Towers and Flags
 - Open all Orders and remove any Unrest
 - Move any Region Loot Token to the President's Box Faceup; this Region is now associated with this Presidency.
 - If there is no Governor General in place, place the Governor Overlay in the Region and put the matching Governor Officeholder Card into Vacant Offices.
 - If the Elephant was in the Invaded Region and faced another Region, put it in the center of the invaded Region.
5. **Catastrophic Failure:** Return your Commander and half (rounding up) of your Family's Trophies.

Governor

Skip this if there is a Governor General

▪ **May Administer**

1. Create a dice pool = number of your Office Card.
2. Make a check, remaining dice in the pool
3. **Success:** Receive a £1 bonus, an additional £1 bonus if you failed your previous roll, and choose:

- Build Company Ship and place it in your Region (on land).
 - Move a Company Ship already in your Region into the Sea Zone associated with your Presidency.
 - Place a Regiment in the top half of your Army Box.
 - Tax: Add £2 to either the Company Balance or your President's Treasury.
 - Do not split this amount.
 - Each time you choose this after your first time this turn, add one Unrest Cube to the Region.
4. **Failure:** Add an Unrest Cube to the Region.
5. Lower the number of dice in the pool by 1.
6. Until your run out of dice (or roll a catastrophic failure), you may go back to step 2 and roll the remaining pool to administer again.

Superintendent of China

- This Office acts after the Presidency of Bengal, after it has been created.
- Ships in this zone count as if they were in the Eastern Sea zone.
- **May Trade in China:**
 - Make a check, 1 die per ship, only one attempt, can only be attempted if there are Export Icons in Company-Controlled Regions.
 - **Success:**
 1. Increase the Company Balance by £4 for each Export Icon in all Company-Controlled Regions.
 2. Receive a £1 bonus from the bank for each Export Icon in all Company-Controlled Regions.

Bonuses

- Take £1 for each shipyard with a fitted ship
- Take £1 for each workshop.

Revenue

1. **Pay Firms Expenses and Dividends** by initiative order with ties broken by 1) Windows on cards and prizes, 2) clockwise and starting with Prime Minister.
- **Pay Firm Expenses** from London or India Treasury:
1. Pay £1 for each Ship
 2. Pay £1 for whichever is higher: Amount of Shares in Firm Share Box or Firm Value
 3. If the Expenses cannot be paid, consider the following options:
 - Emergency Investments (following the Firm Investment rules described under Firms).
 - Any cash remaining after paying the expenses is lost.
 - Lower the Firm's value by 1 for each Emergency Investment

- You can still take Emergency Investments at the left-most value.

- Emergency Mergers (following the Firm Merger rules described under Firms):

- The other Firm must first pay their own expenses.
- The other Firm must then pay any outstanding expenses owed by the Firm that cannot pay their own expenses.

4. **Dissolve the Firm** in Expenses cannot be paid.

- Move Shares to the Debtor's Prison Box of the Deregulation Card.
- Return Firm Ships to their Shipyards
- Flip the Firm Charter Board to its Family Side, and leave the Workshops as Invested.

- **Pay Firm Dividends** from India Treasury only:

1. A dividend = £1 to each Firm Share and £1 for the Firm Manager/Owner.
 - Dividends must be paid out as a whole, but players can choose to forgo their share of a Dividend to allow for the entire India Treasury to be paid out (see example p. 42)
 - A Firm that pays a Dividend is allowed to perform a Special Retirement during London Season.
2. Record the total amount of cash paid out in Dividends by placing the second Firm Cube on the Company Balance Track.
 - Hob-Nob Strategy Firms leave their Firm Cube where it was and do not reset to zero.
3. Cash remaining in the India Treasury is moved to the London Treasury

2. **Pay Company Expenses:** Subtract £1 from the Company Balance for 1) each debt, 2) each Regiment in an Army Box (not for Local Alliances), 3) each Officer (not the Commanders) in an Army Box, and 4) each Ship in a Sea Zone (including China).

- If needed, **take Emergency Loans**, which do not add to your debt expense this turn.

1. Increase the Debt marker by 1 and adding £5 to the Company Balance when you cannot pay your expenses
2. Set the Company Balance to zero after all expenses are paid if you have taken Emergency Loans
3. If 1-2 Emergency Loans were taken: Lower Company Standing by 1.
4. If 3+ Emergency Loans were taken: Lower Company Standing by 2.

- If the Company Standing Marker reaches the left-most space, the Company has failed. Immediately go to Final Scoring.

- Unlike the Chairman's first action, you can still take more Emergency Loans when the debt marker is at the right-most spot.
3. **Check Expectations** by lowering the Company Standing by 1 if the Company Balance *is less than* the expectations.
- If the Company Standing Marker reaches the left-most space, the Company has failed. Immediately go to Final Scoring.
4. The Chairman may **Pay Dividends**:
- A dividend = number of Company Shares (incl. Chairman's), hence each player receives £1 for each of their Company Shares.
 - The Chairman may pay out multiple Dividends, but they cannot pay out a partial one.
 - If the total cash paid in Dividends *was more than* the Expectations, advance the Company Standing by 1.

Events in India

1. Roll and resolve the storm die

- Roll a die for each Non-Company/Non-Extra Ship in the rolled sea zone(s), **including Firm Ships with Strategy Cards that match the sea zones.** 3 Storms = all Sea Zones.
 - 1-2: Nothing happens
 - 3-4: Flip Non-Fatigued Ship to Fatigued side. Return Fatigued Ship to the Shipyard.
 - 5-6: Return the Ship to the Shipyard.

2. Resolve events equals to the die number:

- Flip a tile from the Face-Down India tile Draw Stack to the Face-Up India Drawn Stack
 - Resolve the event
 - **Turmoil:**
 - Close Northernmost Open Order in the Location at the top of the Draw Stack. Check for Cascades/Writer's Loss.
 - **Windfall:**
 - Each player takes £1 from the bank for each writer in the Location at the top of the Draw Stack and Regions adjacent to it.
 - **Shuffle:**
 - If the Draw Stack is not empty, perform Elephant's March
 - Shuffle this tile with the Draw Stack.
 - Shuffle the Drawn/Discard Stack.
 - Put the shuffled Drawn/Discard Stack on top of the shuffled Draw Stack.
 - If you did not perform an Elephant's March in step 1, perform an Elephant's March now.

○ **Leader:**

- If the Location at the top of the Draw Stack is Sovereign (star flag or no flag) then add a Tower Level to the Location at the top of the Draw Stack.
- If the Location at the top of the Draw Stack is not Sovereign, resolve a Rebellion in the Location at the top of the Draw Stack with a strength modifier equal to the tile.
- If the Elephant was fully in the Location at the top of the Draw Stack, and the Location at the top of the Draw Stack was Company-Controlled, and the Rebellion was successful, then perform an Elephant's March.

○ **Peace:**

- If the Elephant is on a border:
 1. Open any Orders connected to the Border the Elephant stands on.
 2. Add on Tower Level to each Non-Company-Controlled Region touching the Elephant.
- If the Elephant is wholly in a Region:
 1. Open all Orders and remove all Unrest Cubes in the Elephant's Region.
 2. Perform the Elephant's March.

○ **Crisis:**

- If Elephant's Tail in Sovereign Region: Resolve Invasion.
- Otherwise: Rebellion

○ **Foreign Invasion:**

- Roll the storm die
- If Storms were rolled: Resolve an Invasion in each Region linked to a rolled Sea Storm through a port.
 - Roll a d6 to determine the Invasion strength
 - Successful Invasion:
 1. Perform all usual Invasion steps
 2. Close every open Order in the invaded Region, check for Cascades/Writer's Loss. (This will always Cascade in a Company-dominated Region due to the Region Loss.)
 3. Turn the Region into Sovereign, no-flag dome, with strength set to half the Invasion Strength, rounded down.
 4. If the Invaded Region was a Capital Region, remove all flags of the Empire.
 5. If the Invaded Region was Company-Controlled with the Elephant inside of it, perform an Elephant's March with a Circle symbol for the shape.
- If no Storms were rolled: Resolve an Invasion in the Location at the top of the Draw Stack

- If you have not resolved as many events as the number rolled on the storm die, repeat from step 1.

India Actions Explained

• **Invasion:**

1. Calculate the Attacker's (Elephant's Tail Region) Strength, adding the following:
 - Region Strength
 - Add modifier on the tile's event
 - If Capital Region (Star Flag): Add the Strength of all Regions with a small flag of the same color
 - If Company Defender: add 1 for every Unrest Cube in this Region
 2. Calculate the Defender's (Elephant's Head Region) Strength
 - Non-Company Defender: Tower Level
 - Company Defender:
 - The Commander sets Strength in the same way as during a Deploy action (exhausting pieces in the Army Boxes).
 - If the Commander is vacant, then 1) Military Affairs, 2) Chairman makes the decisions; players do not gain or lose trophies in this case.
 3. If Attacker Strength > Defender Strength: Resolve Successful Invasion
 - If Non-Company Defender:
 1. If the Attacker does not have a flag and there are still flags remaining, it gains a star flag
 2. Remove any flag on a Defending Region
 3. If the Defending region had a Star Flag, remove it and all flags of that color.
 4. If there are still flags remaining, place a flag of the Attacker's Color on defending region's dome
 - If Company Defender: Perform Region Loss
 4. If Attacker Strength <= Defender Strength: Resolve Failed Invasion
 - Remove one Tower Level from the Attacker (regardless of Company/Non-Company Defender)
 - If Company Defender:
 - Remove all Unrest Cubes in the Attacked Region
 - The Commander associated with the region gains a trophy token
 5. If this was an Attack on the Company, resolve a Rebellion in each other Region with an Unrest Cube, in order of Presidencies (starting with Bombay)
 - Same procedure as a regular Rebellion, but the Attacker's Strength is equal to each Unrest Cube, nothing else
 6. Perform an Elephant's March.
- #### • **Rebellion:**
1. Calculate the Attacker's (Dominated Region) Strength

- Region Strength (Tower Level)
 - Add modifier on the tile's event
 - If attacking the Company, add 1 for every Unrest Cube in the Region
2. Calculate the Defender's (Sovereign Region) Strength
 - If Non-Company Defender:
 - Only Region Strength (Tower Level)
 - Do not include other Dominated Regions in the Empire as you would in an invasion.
 - If Company Defender:
 - The Commander sets Strength in the same way as during a Deploy action (exhausting pieces in the Army Boxes).
 - If the Commander is vacant, then 1) Military Affairs, 2) Chairman makes the decisions; players do not gain or lose trophies in this case.
 3. If Attacker Strength > Defender Strength: Resolve Successful Rebellion
 - Non-Company Defender:
 - Return the Attacker's flag to the supply.
 - Close every open Order in the Attacker's Region, check for Cascades/Writer's Loss.
 - Company Defender: Perform Region Loss
 4. If Attacker Strength <= Defender Strength: Resolve Failed Rebellion
 - If Non-Company Defender: Remove one Tower Level from the Attacker
 - If Company Defender:
 - Remove all Unrest Cubes in the Attacked Region
 - The Commander associated with the region gains a single trophy token
 5. If this was an Attack on the Company, resolve a Rebellion in each other Region with an Unrest Cube, in order of Presidencies (starting with Bombay)
 - Same procedure as a regular Rebellion, but the Attacker's Strength is equal to each Unrest Cube, nothing else
 6. Perform an Elephant's March.
- #### • **Region loss:**
1. The Commander of the Army associated with the lost Region return half (rounded up) of its Family's Trophies
 2. Return the Commander to the supply
 3. Roll a d6 for every Officer in the Army and remove them on 6s
 4. Remove any Local Governors (card to Vacant Offices, Family Member to supply, any fatigue to the supply, remove the Governor Overlay). Skip this step if there is a Governor General.
 5. Remove any Company Ships.
 6. Remove any Unrest Cubes.

7. Place a **Dome** with Tower Level 1, add a flag if this was an invasion.
 8. Return the **Loot Token** for the Region facedown.
 9. Close every open Order in the Region, check for Cascades/Writer's Loss
 10. Lower the Company Standing by 1 to the left for each Region lost this turn (including this one). (I.e., 1st loss = 1, 2nd loss = 2, etc.)
 11. If Company Failure is caused by step 10, the game is over. Resolve Final Scoring.
- **Writer's loss:** When closing an Order with a Writer, return the Writer back to the supply.
 - **Cascades** are performed when you need to close an Order in a Region, but all Orders are already closed.
1. Close all Orders connected to the Orders in the Cascading Region.
 - Orders that branch out into >1 connections do require >1 Orders to be closed.
 2. If a connected Order is already closed:
 - If the Region has any Open Orders, close the Northernmost Open Order in that Region instead.
 - If the Region has no Open Orders, trigger an additional Cascade.
- Each Region can only Cascade *once* during one Event Tile.
- **Elephant's March:**
1. Check for "Imperial Ambitions" by doing the following:
 - After a Successful Invasion, the Elephant is moved to the Successful Capital's Region.
 - Otherwise, move the Elephant to the Region on top of the Draw Stack.
 2. Determine new Elephant Position:
 - **Company-Controlled Region:** Center of the Region.
 - **Dominated Region:** Border of the Region facing its current Sovereign.
 - **Sovereign Region:**
 1. Place the Elephant on the border matching the shape printed on the tile (circle, triangle, square), facing that region.
 2. If the Elephant faces a region that is already dominated by the Capital Region, use the first clockwise Region.
 3. If all Regions surrounding the Elephant's Region are dominated, place the Elephant on the border matching the shape on the Elephant redirect arrow and position it so that it is pointing at the Empire's capital.
- The Prime Minister looks at up to 3 law cards, one by one, but must choose any Dilemma that presents itself immediately. The remaining cards is Discarded.
 - The Prime Minister sets the policy by rotating the dial (in either direction) and stopping at the first space that matches the icon printed on the bottom of the law card.
 - The Prime Minister reads the text of the law aloud and marks its starting support on the voting tracker.
 - Starting with the Prime Minister, players take turns voting.
- Voting is done with cards and cash:
 - Players can buy votes for £1 each from their Family Treasury
 - Any card in their play area with votes adds votes as well. (Rotate the card to show they have been used.)
 - If votes go beyond the limits of the tracker, use coins to track additional votes.
 - Once a player votes against, they can no longer vote for, and they become part of the opposition.
 - Keep track of which opposition member cast the most votes.
 - The opposition member with the most votes becomes opposition leader (and takes the token). Ties stay with the previous leader.
 - Players may cast votes on behalf of another player with that player's consent, and these votes are added towards opposition leadership (as the opposition leader becomes president on a failed vote).
 - A player who voted for can later decide to vote against.
 - The Prime Minister cannot vote against the current law or consent to their enterprises to be used against, but their promise note can override this.
- After all players have had a chance to vote, the Prime Minister can decide to call another round or stop and resolve the vote.
 - If no votes cast: the vote must be resolved.
- Resolving the vote:
 - Less than 0 votes = Failure
 - Discard the law, resolve "If Failed" effects
 - Opposition leader loses that token and becomes new Prime Minister
 - The new Prime Minister moves the policy on the dial to an adjacent policy.
 - 0 or more votes = Success
 - Place the Law in the passed laws and activate it.
 - **Governor General** law:
 - Remove all Governor overlays
 - Place the Governor General overlay on the Director of Trade.

- Replace Director of Trade card with Governor General, transfer fatigue.
- The Prime Minister receives a Passed Law Token.
- Resolve the policy effect
- **Tax:** Pay £1 for each depicted target owned, return the target to the supply if you cannot pay.
 - Fitted ships stay in play but the Shipyards are returned and can no longer be bought.
 - **Window Tax:** £1 for each Window on a prize with a family member, and each Window on an enterprise. Return them if you cannot pay.
- **Bonus:** Gain £1 for each target
- **Power:** Swap the position of the Power marker matching the target with the next higher Power marker. If the target's Power marker is already in the highest position, swap the position of any two other Power markers.
- Return any cards used for voting to their regular orientation
- If the Company fails at any point during this phase, resolve the vote and move to Final Scoring.

Upkeep and Refresh

- Pay for family members on prizes (the £ to the right of the Prize's cost).
- Return family members whose prize's expenses cannot be paid to the Supply and adjust the Victory Marker correspondingly.
- Prepare the Board for the next turn or go to Final Scoring
 - Return writers to their Presidencies
 - Return Filled Order Tokens and Presidency Dividers to the Supply
 - Return all Extra Ships to the Supply
 - Re-activate Exhausted Officers, Regiments
 - Exhaust any Active Local Alliances
 - Advance the Turn Marker and Proceed with the first Phase

GAME END

- End the game if the following occurs (but finish the India phase if it triggers during):
 - Company Survival: End after completing the turn prior to the year printed on the turn tracker
 - Company Failure: Company Standing on left-most space
- No more negotiations, promise cards or blackmail cards can be played (unless a card explicitly allows it)
- **Final scoring**
 - If there are Firms in place, resolve the following, regardless of Company Success:

- Score or lose the number of Victory Points indicated by the Firm's Value for each Firm Share Own or each family piece in Debtor's Prison (Rounded Down).
- Perform one Special Retirement (see London Season, resolve Retirements).

- Allocate Victory Points based on Power using the *printed Game End Scoring box* next to the Power Tracker. Calculate Power as follows:
 - Power Track points for each enterprise/Company Share (2 Power for first, 1 Power for second, 0 Power for others) + Prime Minister + Passed Law Tokens points + some Blackmail cards (face-down or up) points + some Spouse cards points + Trophies points
 - Tied 1st place grants lower value to tied players
 - Tied 2nd place grants nothing
- Company Survival:
 - Score Court: +X VP as depicted on the board (or on the overlay) for each share.
 - Final Retirement = final Attrition and Retire rolls for all officeholders, purchase final prizes
- Company Failure:
 - Score Court: -X VP as depicted on the board (or on the overlay) for each share.
 - +1 VP for each Workshop.
 - Consequence of Failure = Draw Consequence of Failure card and resolve it

TERMINOLOGY REFERENCE

- **4+ Vacancies:** Whenever 4 Offices have no family member attached to them.
- **Attacks:** The Company can attack a region through a Commander's Deploy action. The Company can also be attacked through Events in India.
- **Army (Box):** There is an army box on the board for Bombay, Madras and Bengal. It has a spot for a Commander and a top and bottom half. The top and bottom contain army pieces, such as Officers (family members), Regiments or Local Alliances. Pieces in the top half are active, the bottoms ones are exhausted.
- **Balance:** The Company Balance track at the bottom of the board.
- **Bonus:** Either refers to the Bonus phase or times when players receive extra income during their actions. (E.g., the President receives a bonus of £1 for each filled order) Bonuses are usually printed in green in the rulebook/highlighted in green in this document and are paid to the Family Treasury. Note that money generated during the Bonus Stage through Shipyards and Workshops is not an "Officeholder's Bonus".
- **Capital Region:** A capital region is marked by a flag with a star. It has a least one dominated region that is

- marked by a smaller flag of the same metal without a star. If it does not have a dominated region, return the flag with a star to the supply. A capital region also counts as a sovereign region. The capital region and its dominated regions together form an empire.
- **Company-Controlled:** A region in India that doesn't have a tower/dome (revealing the heart-like Company logo) is Company-Controlled. If the Governor General is not in play, it is also indicated by the presence of a Governor Overlay chit.
 - **Company Treasury:** The Company Treasury is tracked through its various Company Office boxes. It is not the same as the Company Balance.
 - **Commander:** Family members in an Army box that can acquire alliances and deploy. They are not Officers and they cannot be exhausted to gain dice in combat.
 - **Consequences:** See Policy (Track).
 - **Deregulation:** Deregulation heals the Company and adds Firms (miniature Companies) to the game. You can vote for deregulation in the 1758 and long 1710 scenarios. In the 1813 scenario deregulation is already active. To vote for deregulation, the Company Standing Marker and/or Company Debt marker needs to be on one of the spaces marked with lines. If either of them is on a space marked with a star, there must be a vote for deregulation.
 - **Dilemma:** A Dilemma is a Law with red lines above and below its title on its card. It needs to be picked immediately by the Prime Minister and addressed.
 - **Dividers:** 6 red rectangular chits with rounded corners that depict a white ornamental line. These are used to break the dotted lines between Orders to clarify when the Orders were filled to determine whether they can be filled again.
 - **Dominated Region:** Dominated regions are indicated in 1 of 3 ways: 1) Dome with a flag (when dominated by a Sovereign region), 2) Governor Overlay (when dominated by the company) or 3) no Dome nor Overlay (when dominated by the Company when there is a Governor General in play).
 - **Empire:** A capital region (flag with star) alongside its dominated regions (small flags in the same metal as the flag with a star) together form an empire.
 - **Emergency Loans:** Loans taken by the Company or Firms when they cannot pay their expenses. If they advance the debt marker, then you do not have to pay additional expenses for the additional debt.
 - **Enterprises:** There are two kinds of enterprises, both of which are identified by anchor, hat, or gear icons: 1) small cards with shipyards, workshops and luxuries, and 2) large prestige cards that have the same icons in the upper right corner. Both are taxed.
 - **Expectations:** Shorthand for Company Expectations.
 - **Expenses:** See the Expenses phase.
 - **Export Icons:** Small white icons depicting a package found in Bengal (2), Delhi, Madras and Hyderabad.
 - **Extra Action:** Additional family actions unlocked through laws; only the most recent Extra Action that was passed is ever active (and their associated laws are not impacted by this).
 - **Family Treasury:** The money that each player has, also referred to as Family Cash.
 - **Fitted:** Fitted ships have left the shipyard.
 - **Foundry:** A Prestige Card that awards £1 for newly purchased Regiments or Workshops.
 - **Game End:** The game ends at the end of the turn prior to crossing the year of the scenario that you are playing (as indicated on the turn tracker printed on the game board).
 - **Governor General:** This Office replaces the Director of Trade after the “Governor General” Law has been passed. It has an overlay chit to place on the board.
 - **Governor Overlay:** The oval chits with a thick red border that has the icon of a region printed on it. They are placed on regions after successful Deploy actions by a Commander.
 - **Hiring Preference:** A blackmail card to force someone to hire you. It does not apply in Chairman elections, but it does apply during the Military Oversight law.
 - **Home Port:** Orders with thick borders within Bombay, Madras and Bengal, located next to their associated Sea zones.
 - **Home Region:** Bombay, Madras, Bengal. Losing a Home Region does not impact actions or ownership of associated regions.
 - **Imperial Ambitions:** Read this as “If there was a successful Invasion, move the Elephant to the successful Capital’s Region, otherwise move the Elephant to the Region on the top of the draw stack.”
 - **Foreign Invasion:** See Event in India.
 - **Lines on Standing/Debt Spaces:** In the 1758 and long 1710 scenarios, the Prime Minister is allowed to call for a vote on deregulation, see p. 36.
 - **Labor Newspaper:** Prestige card; the extra votes come with a chosen policy, not the law.
 - **Local Alliance:** Local alliances are temporary Army pieces. Each piece can only be used once on the turn they are purchased, and its strength cannot be split among more than one purpose.
 - **Long 1710 game:** Start the game with the 1710 scenario and the 1710 setup cards but play all 8 turns or end on Company Failure

- **Loot:** Collected after a successful Deploy action by a Commander.
- **Luxury:** A small pink Enterprise card with Victory Points/Windows. Prestige Cards with a hat icon do not count.
- **Making a check:** Rolling a certain number of dice to see if an action is a success, a failure, or a catastrophic failure. Certain success checks come with penalties.
- **Manufacturing Enterprise:** Enterprises with the gear icon
- **Manufacturing Policy:** A Policy with the gear icon.
- **Non-Company-Controlled:** Any region in India that has a Tower.
- **No Penalty:** Used to indicate that there are no negative modifiers to an action (e.g., in the Director of Trade's Special Envoy action), even though similar actions do have such modifiers (e.g., President's Trade Action).
- **Office:** The positions that family members can hold in the game, such as Chairman, Director of Trade, etc. Each Office has a card.
- **Officeholder:** A family member that holds an Office. Excludes Writers/Commanders.
- **Officeholder's Bonus:** See Bonus.
- **Officer:** Family members in an Army box that are not Commanders. They can be exhausted to gain dice in combat.
- **Opportunity Token/Marker:** The glass bead that goes on your family board to select a Family Action. The Lady Glencora Prestige Card can remove it.
- **Passed Law Duration:** Passed Laws remain active until the end of the game.
- **Passed Law Tokens:** The Prime Minister gets a Passed Law Token when a law successfully passes.
- **Penalty:** Whenever the player receives a negative modifier or punishment. Also see "No Penalty".
- **President's Bonus:** The bonus a President receives for each filled order during a Trade.
- **Prestige Cards:** The large cards with a red back that go into the London Display.
- **Prizes:** The estates printed on the left side of the board. Note that the top prize does not offer victory points but buying it does allow you access to a Prestige Card during the London Season.
- **Promise Card:** Each family has a set of Promise Cards that can be used to make long-term deals.
- **Promise Cube:** The Crown comes with 12 red Promise Cubes that are used to simulate negotiations.
- **Power:** The Power icon looks like the Victory Points icon, but it is round instead of a diamond, and it has a different mechanic. Power comes from the Power Track with the 4 Power Tokens, the Prime Minister position, passed law tokens, prestige cards and trophies. Players' Power rankings gain them Victory Points at the end of the game.
- **Power Tokens/Track:** The hat, gear and anchor on enterprises and shares/company logo (heart) on the stock exchange will be converted to victory points at the end of the game and are used in parliament. Enterprises/Company Shares at the top spot are worth 2 Power, second spot are worth 1 Power, others are worth 0 Power.
- **Regiments:** Regiments are square chits depicting soldiers. Also referred to through the Drum icon and are placed in an Army Box. Regiments are added by Governors, and they can only be removed from play by the War Against France law.
- **Region associated with a Presidency:** A company-controlled Region that is associated to the Presidency that invaded it as indicated by the region loot token.
- **Repair Ships:** You cannot repair ships.
- **Retirement Discount:** Certain Spouse Prestige Cards (such as Lord Highgate) provide a retirement discount of -£1 or -£2 that can be used to purchase future prizes.
- **Rotten Borough:** A type of Prestige Card.
- **Share:** Usually shorthand for Company Share, indicated by family members in Court of Directors. Firms have Firm Shares as indicated by family on the Firm Charter Board. Family on the stock exchange do not count as Shares.
- **Shipyards:** A small blue Enterprise card with Ships/votes/Bonus Phase income. Prestige Cards with an anchor icon do not count.
- **Shipping Enterprises:** Enterprises with the anchor icon
- **Shipping Policy:** Policy with an anchor icon.
- **Sovereign Region:** income There are two types of sovereign regions: 1) capital regions with a flag with a star, and 2) regions without flags.
- **Standing:** Shorthand for Company Standing
- **Stars on Standing/Debt Spaces:** In the 1758 and long 1710 scenarios, the Prime Minister must call for a vote on deregulation.
- **Stock Exchange track:** The track above the Court of Directors on the game board that depicts values from £2 - £5, see p. 14. Family members here do not yet count as Shares.
- **Social Enterprises:** Enterprises with the hat icon. They represent social capital, conspicuous consumption, wanton flaunting of wealth, keeping up appearances, etc.
- **Social Magazine:** Prestige card; the extra votes come with a chosen policy, not the law.

- **Superintendent of Trade in China:** This is an additional office that gets added after passing the “Envoy to China” Law or after the Director of Trade opens trade with China. It adds a special tile to the board.
- **Surviving:** Officers not hitting a 6 on the d6 roll after a battle.
- **Trophies:** Trophy tokens are received for successful Deploy actions.
- **Turmoil:** See Events in India.
- **Unrest (cubes):** Unrest Cubes accumulate in India regions whenever Governors fail checks. Each cube increases the strength of attacks against the Company, and whenever a company region is attacked for any reason, all other regions with Unrest attempt a Rebellion
- **Vacant Offices box:** Whenever an Officeholder is removed from office, the corresponding Officeholder card is moved to this area on the board (#24).
- **Victory Points:** The player with the most victory points wins the game. Be careful not to confuse these with Power. Whenever victory points are gained or lost, immediately adjust the victory point marker.
- **War Against France:** A Dilemma that sends Ships (including Firm ships), Regiments and Officers (i.e, not Commanders) to the supply.
- **Window Tax:** Every player must pay £1 for each Window on a prize with a family member, and each Window on an enterprise. Return them if you cannot pay.
- **Workshop:** A small yellow Enterprise card with votes, Company failure-only Victory Points and Bonus Phase income. Prestige Cards with a gear icon do not count.

BEGINNER STRATEGY NOTES

- **Narrative:** This is not so much a game about winning and being competitive (although it very much offers those kinds of fun) as it is a game about seeing a story come together.
- **Luck:** The game involves a lot of chance and position reversals. To win, you need equal amounts of strategy, negotiation, and luck. Make a lot of deals to position yourself and do not worry about optimizing die rolls much.
- **Company Failure** is a big part of the game and crashing it when you are in a winning position and can do so is a valid strategy. When you find yourself in a situation, the bigger question is not “Should I crash the company?”, but “Can I crash the company?”
- **Prized Retirements** (along with Luxuries and ranking high on Power) win the game. To get Retirements and Prizes, you need 1) family members in Office and 2) cash.

- Family members that retire from Office come from investing in Writers or Shares.
- Cash is obtained through Dividends (Shares), trade (Presidents, Writers), looting regions (Commanders, Officers), taxes (Governors), passive bonus (Workshops, Shipyards), export (Superintendent of Trade in China) and making deals.
- **Cost of Success:** The further you get ahead by acquiring prizes, the more you will be taxed and have to pay in upkeep.
